DOCUMENT RESUME

ED 069 417 PS 006 159

TITLE	The Collaborative Study on Cerebral Palsy, Mental Retardation, and Other Neurological and Sensory Disorders of Infancy and Childhood. Bibliography No. 5, July 1971 through June 1972.
INSTITUTION	National Inst. of Neurological Diseases and Stroke (NIH), Bethesda, Md.
REPORT NO	DHEW-NIH-73-384
PUB DATE	31 Aug 72
NOTE	20p.
EDRS PRICE	MF-$0.65 HC-$3.29
DESCRIPTORS	*Bibliographies; *Mental Retardation; *Neurology; *Sensory Deprivation

ABSTRACT

The fifth in a series of annual bibliographies of Collaborative Perinatal Project is presented. All manuscripts based on core data presented at national and international professional conventions and/or published in variety of medical and public health journals or periodicals are covered. (NF)

FOREWORD

This document is the fifth in the series of annual bibliographies of the Collaborative Perinatal Project.

The publication covers in scope all manuscripts based on core data that were presented at national and international professional conventions, and/or published in a variety of medical and public health journals or periodicals. Core refers to patient selection by a systematic sampling method approved for each participating institution.

Manuscripts based on core data collected by all the Collaborating Institutions are cleared prior to presentation or prior to submission to a journal by an established NINDS-NIH mechanism for merit review. Perinatal Research Branch investigators submit all their manuscripts (pooled or local core and non-core) to the same review process. Manuscripts based on local core data are reviewed by the respective authorities at the local Collaborating Institutions.

Joseph S. Drage, M.D.

PREFACE

This is a compilation of Collaborative Perinatal Research Project publications from July 1971 through June 1972, the fifth in the series of annual bibliographies prepared at the end of each fiscal year.

The publications herein include:

1. Pooled core data publications (publications based on Project data collected by all Collaborating Institutions*)

2. Local core data publications (publications based on Project data collected by any one Collaborating Institution)

3. Non-Project studies of special interest to authors at Perinatal Research Branch as well as those from authors in the Collaborating Institutions who are paid in part or in toto from Collaborative Perinatal Research Project funds.

Authors of Collaborative Project publications wishing consideration of articles not included are invited to send information together with reprints to:
